Dear Parent / Guardian

**ELECTRONIC CONSENT FOR TETANUS, DIPHTHERIA POLIO (Td/IPV)  
& MENINGITIS ACWY**

	<p>These vaccines are routinely given at school in Year 9. They are given at the same time.</p> <p>The teenage booster, also known as the 3-in-1 or the Td/IPV vaccine, is a single injection given to boost protection against 3 separate diseases: <a href="#">Tetanus</a>, <a href="#">Diphtheria</a> and <a href="#">Polio</a>.</p> <p>The <a href="#">MenACWY</a> vaccine is given by a single injection into the upper arm and protects against 4 strains of the meningococcal bacteria – A, C, W and Y – which causes <a href="#">Meningitis</a> and blood poisoning</p> <p>It is very important your child has these vaccines to complete their routine childhood immunisations.</p> <p>Please click on this <a href="#">link</a> to view the routine UK schedule.</p>
